PRETORIA
0001

Dear Minister

MINUTE M12/2017: INCREASE IN THE RATE OF CUSTOMS DUTY ON WHEAT AND WHEATEN FLOUR IN TERMS OF THE EXISTING VARIABLE TARIFF FORMULA

In terms of the recently reviewed variable tariff formula for wheat, the customs duty on wheat is calculated as the difference between the domestic reference price for wheat of US\$279.00/ton and the current 3-week moving average US No. 2 HRW (ord) Gulf settlement price for wheat. Adjustments to the level of protection are effected when the difference between the current 3-week moving average price and the 3-week moving average price on which the last duty triggered was calculated, amounts to more than US\$10/ton for 3 consecutive weeks. The resulting Dollar duty will be converted to Rand, based on the Rand/Dollar exchange rate prevailing on the day that the adjustment is triggered and subsequently adjusted with the latest available Real Effective Exchange Rate Index as published by the South African Reserve Bank.

The International Trade Administration Commission of South Africa (ITAC) considers adjustments in the customs duty on wheat, once the conditions for adjustment are met.

In terms of the recently reviewed and approved variable tariff formula for wheat, conditions for an upward adjustment in the tariff were met and the South African Grain Information Service (SAGIS) and Grain SA forwarded letters of confirmation to this effect.

Wheat pricing information, confirmed by the South African Grain Information Service (SAGIS) and Grain SA, indicated that conditions for an upward adjustment in the customs duty were met on 05 September 2017, when the 3-week moving average of the US No. 2 HRW (ord) Gulf settlement price for wheat triggered an adjustment at US\$199.33/ton. The corresponding R/\$ exchange rate was 12.9677. If the domestic reference price, the 3-week moving average price, the exchange rate on 05 September 2017 and the latest available Real Effective Exchange Rate (REER) Index as published by the South African Reserve Bank (88.08 for June 2017) are applied to the formula, the customs duty on wheat needs to be adjusted upward from 75.24c/kg to 91.00c/kg.

As the customs duty on wheaten flour is set in the form of a specific duty at the level of 150% of the rate applicable to wheat, the customs duty on wheaten flour also needs to be increased from 112.85c/kg to 136.50c/kg.

In light of the above, the Commission recommends that the rate of customs duty on wheat and wheaten flour, classifiable under tariff headings 1001.90 and 1101.00, be increased from 75.24c/kg and 112.85c/kg to 91.00c/kg and 136.50c/kg, respectively.

Yours sincerely

Siyabulela Tsengiwe
Chief Commissioner
